

### Match 17 Chart 29th October 2023

Weather for this match was as expected – atrocious..... rain (some very heavy), wind (some strong gusts) and more doom and gloom. Definitely autumn is here.....

The lake was covered in leaves and there was plenty of debris in the water to catch.

Saying this, there were several carp willing to jump and show themselves (where I was there was.....)

We had nine hardy souls for this match and it was the first win for our latest recruit Ben. I am sure he enjoyed it.

Runner up was the LGAC stalwart Ross. He has been a member for a long, long time and usually once or twice a year he puts up a net of fish to be proud of and today was one of them.

Most fish caught were carp but the resident “silver fish man” (Fordy) had an enjoyable 6lb of smash to weigh in.

The fish were a bit coy and took some skills to get feeding and that seemed to be mainly in the afternoon.

Many of us had quiet spells particularly in the morning but it all seemed to get a lot better in the afternoon.

Glad to report that we didn't have any “incidents” where members injured themselves after the 2 accidents at Arrans, although Ian managed to hit himself in the head with a bungee strap before he left home which needed a plaster.

Next venue will could also be prolific, make sure you have sufficient nets – Orchard Farm – Lake 6 at Paddock Wood.

Anyone NOT going please let either Ross or Myself know. Thanks
